cooperation
DEUTSCHE ZUSAMMENARBEIT

2.1. Engineering

Planning

- Detailed demand assessment verification
- Distribution and generation system design
- System design evaluation
- Tech specs and standards compliance

Implementation

- Equipment procurement and checks (quality and quantity)
- Installation supervision – in line with Nigerian and IEC standards
- Testing and commissioning support

Post Implementation

- Performance monitoring and integrity checks on components
- Reliability of electricity services, user benefits and impacts
- Demand stimulation

European Union

2.2. Financing

- Acquisition of fiscal incentives (tax holidays or import duty waivers).
- Raising finance:
 - Adjusting financial models according to terms and conditions of financiers.
 - Due diligence and risk assessment.
 - Developer/investor match-making.

European Union

2.3. Legal & Regulatory

- **Regulatory:** Provide guidance, advice and legal opinions in the procurement of regulatory approvals.
- **Legal:** Support in the development of legal templates and facilitation of agreements under the Scheme and legal opinions as may be required.
